SANKET PATIL

AI / GenAI Engineer | LLM Integration & RAG | Python, FastAPI, LangChain | NLP & Machine Learning | PostgreSQL
Pune, Maharashtra, India | 8080235840 | spatil09921@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Python Full Stack Developer Intern with a B.Sc. in Computer Science (2026), focused on **Data Analytics, Generative AI, and Python Development**. Hands-on experience with **Python**, SQL, **PostgreSQL**, **Django**, FastAPI, and **REST APIs**, along with data cleaning, data transformation, exploratory **data analysis, Pandas, NumPy, SQL queries, joins**, and aggregations. Familiar with **Power BI**, **DAX**, KPI **dashboards**, **data visualization**, and business insights to support data-driven decision-making. Experienced in **Generative AI, LLM API integration, prompt engineering, embeddings,** Retrieval-Augmented Generation (**RAG**), **LangChain**, semantic search, and vector databases. Focused on improving API response time, data processing efficiency, retrieval performance, and workflow automation, targeting **20–30% improvement** where measurable through testing and optimization. Familiar with Git, **GitHub**, **Pytest**, ChatGPT, Claude, Google Gemini, GitHub Copilot, Cursor, and Microsoft Azure Fundamentals. Seeking opportunities as a **Data Analyst, GenAI Engineer, AI Developer, or Python Developer**.

TECHNICAL SKILLS

Programming Languages: Python, SQL
Generative AI & LLMs: Generative AI, Large Language Models (LLMs), LLM API Integration, Retrieval-Augmented Generation (RAG), Prompt Engineering, Embeddings, Semantic Search, Vector Search
AI Frameworks & Tools: LangChain, LangGraph, Hugging Face, OpenAI API, Anthropic API, FAISS, ChromaDB, Ollama
AI Productivity Tools: ChatGPT, Claude, Google Gemini, Microsoft Copilot, GitHub Copilot, Cursor, Perplexity, Grok
Backend Development: Django, Django REST Framework (DRF), FastAPI, Flask, REST APIs, CRUD Operations, API Integration, Input Validation, Exception Handling
Data Analysis & Machine Learning: Pandas, NumPy, Scikit-learn, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, Machine Learning Fundamentals
Databases: PostgreSQL, MySQL, SQL Queries, Joins, Subqueries, Aggregate Functions, Database Design, Query Optimization
Data Visualization & BI: Power BI, DAX, KPI Dashboards, Data Visualization, Business Reporting, Trend Analysis
Testing & Version Control: Pytest, API Testing, Debugging, Git, GitHub
Cloud & Deployment: Microsoft Azure Fundamentals (AZ-900), Docker

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern | Microdynamic Software Private Limited Oct 2025 – Present

- Developed Django-based backend modules for business logic, database operations, and CRUD functionality.
- Integrated LLM APIs, embeddings, and RAG workflows into Python applications for context-aware information retrieval.
- Optimized SQL queries and backend workflows, targeting a **25% improvement in API response time**.
- Implemented input validation, exception handling, and API testing, targeting a **20% reduction in recurring application errors**.
- Improved data processing and debugging workflows using Python and SQL to support application reliability.

PROJECTS

AI-Powered Document Intelligence & RAG Assistant
Technologies: *Python, FastAPI, LangChain, LLM API, RAG, Embeddings, FAISS/ChromaDB, PostgreSQL*

- Developed a **RAG-based document question-answering assistant** to retrieve relevant information from uploaded PDF documents.
- Implemented **document parsing**, **text chunking**, **embedding generation** and **vector similarity search**; optimized chunking and retrieval, targeting a **20%** improvement in retrieval efficiency.
- Integrated **LLM APIs** to generate context-aware responses grounded in retrieved content, with source references to improve answer traceability.
- Built **FastAPI REST** endpoints with input validation, exception handling and response testing; optimized document processing and **API workflows**, targeting a **25**% reduction in response latency.

Sales Performance & Customer Insights Analytics
Technologies: *SQL, Python, Pandas, PostgreSQL, Power BI, DAX*

- Developed **Python and SQL workflows** to clean, transform and validate sales datasets.
- Optimized **SQL queries and Pandas transformations**, targeting a **30%** reduction in **data processing time.**
- Built **interactive Power BI dashboards** with optimized **DAX measure**s (KPI cards, monthly trends, product and customer-segment analysis), targeting a **25%** reduction in **report-generation time.**
- Analyzed revenue, profit margins, sales trends and customer purchasing patterns to support data-driven decisions.

E-Commerce Platform with Inventory & Order Management
Technologies: *Python, Django, Django REST Framework, PostgreSQL/MySQL, HTML, CSS, JavaScript, Pytest*

- Developed a **Django-based e-commerce** application with authentication, product listings, shopping cart functionality and order management.
- Optimized **Django ORM queries** and **database operations**, targeting a **25% improvement** in **API response time**.

- Implemented **RESTful APIs** with **Django REST Framework** for product management, order processing and inventory updates.
- Streamlined inventory validation and order-processing workflows, targeting a **20%** reduction in processing **time**.

EDUCATION

B.Sc. Computer Science | Sangola College, Sangola 2023 – 2026
Punyashlok Ahilyadevi Holkar Solapur University | CGPA: 8.14

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft
- Anthropic: Claude 101, Claude Code 101, Claude Platform 101, Claude Cowork, Claude Code in Action, AI Fluency — Anthropic
